

AURA 5.0

PRECISION PEPTIDE RESEARCH

Operated by FGK Group

CONCEPT PACKAGING

Precision research. Modern vitality.

AURA 5.0, operated by FGK Group, is a premium research brand combining a focused compound portfolio, scientific education, and distinctive presentation. Built for researchers, laboratories, distributors, and strategic partners, AURA connects performance, beauty, metabolism, and cellular vitality with disciplined, evidence-aware communication.

FEATURED PORTFOLIO

8 COMPOUNDS

Performance & recovery

Tissue repair, adaptation, and resilience in preclinical research models.

BPC-157 / TB-500

Beauty & skin biology

Collagen, extracellular matrix, and skin-barrier research.

GHK-Cu / KPV

Metabolic research

Appetite, metabolism, and body-composition pathways.

Retatrutide / Tesamorelin

Energy & vitality

Mitochondrial function and cellular-energy research.

MOTS-c / NAD+

NAD+ is a coenzyme, not a peptide.

THE AURA STANDARD

Precision

Clear product identity and evidence-aware research profiles.

Traceability

Lot identity, certificates of analysis, and supporting testing records.

Partner readiness

Product education, premium sales materials, and launch planning.

Explore the portfolio. Build a partnership.

Research buyers / Distributors / Strategic partners
