THE PRODUCT PROPOSITION

Turn a complex category into a clear premium offer

AURA 5.0 combines a focused portfolio, disciplined documentation, and partner-ready presentation.

PRODUCT	Eight featured compounds organized around clear research territories
QUALITY	Lot-specific evidence and documentation support professional due diligence
PRESENTATION	A premium visual system makes the portfolio easier to understand and present
PARTNERSHIP	Sales tools and launch support help qualified partners build responsibly

RESEARCH USE ONLY

Not for human or veterinary use.
Verify each lot, claim, and market
requirement before sale or
distribution.

Five themes make AURA 5.0 easy to navigate

These themes organize buyer interest and scientific education; they are not treatment or outcome claims.

Athletic performance

Performance, resilience, and recovery research

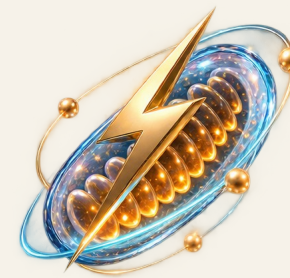

Beauty & wellness

Skin, collagen, and matrix biology

Healthy weight management

Appetite, metabolism, and body-composition research

Energy & vitality

Mitochondrial and cellular-energy research

Healthy aging

Repair, adaptation, and longevity research

PRODUCT PORTFOLIO

Eight compounds. One focused commercial range.

METABOLIC

Retatrutide

Tesamorelin

REGENERATIVE

GHK-Cu

BPC-157

PERFORMANCE

MOTS-c

TB-500

INFLAMMATION

KPV

BPC-157

CELLULAR ENERGY

NAD+

MOTS-c

SKIN BIOLOGY

GHK-Cu

KPV

FOCUSED BY DESIGN

Simple enough to explain. Broad enough to serve multiple research conversations. Verify every lot against its current specification and release documentation.

PRODUCT FORMAT

Premium vial-and-tube presentation elevates every SKU

VIAL FORMAT

Clear research vial

Lyophilized material

PROTECTIVE TUBE

Navy tube

Concept housing

LOT IDENTITY

SKU + lot pairing

Match to records

DOCUMENTS

COA + release data

Lot-specific review

STORAGE

Label-led conditions

Cold chain if required

SKU CONFIGURATION

Confirm per SKU

Format varies

CONCEPT PACKAGING

The visual system is a sales concept. Final vial, fill, tube, label, storage, and documentation details are confirmed by SKU and lot.

Two products open the metabolic research conversation

Retatrutide and Tesamorelin have distinct scientific and regulatory contexts. Verify each SKU and lot.

RETATRUTIDE	Investigational triple agonist spanning GIP, GLP-1, and glucagon pathways
TESAMORELIN	Synthetic GHRH analog with established, indication-specific clinical context
BUYER FIT	Metabolism, body-composition, and endocrine-pathway research programs
SELL WITH	Lot identity, COA, storage requirements, and market-specific claim review

RESEARCH USE ONLY

Confirm product format, concentration, lot records, storage, and local market status before sale.

MOTS-c and NAD+ connect performance with cellular energy

MOTS-c

Mitochondrial peptide for metabolism and exercise models

NAD+

Redox coenzyme for energy-transfer and repair research

BUYER FIT

Cellular-energy and performance research programs

SELL WITH

Clear peptide/coenzyme distinction and lot records

Keep the science precise: NAD+ is a coenzyme; MOTS-c is a peptide research material.

BPC-157 and TB-500 serve preclinical recovery research

Both materials belong in evidence-aware research conversations—not therapeutic promises.

BPC-157	Synthetic 15-amino-acid peptide studied in tissue-repair and gastrointestinal models
TB-500	Thymosin beta-4-related fragment explored in cell-migration and tissue-repair models
EVIDENCE	Primarily preclinical or early translational; human evidence remains limited
SELL WITH	Lot records, research-only boundaries, and jurisdiction or sport-status review

RESEARCH USE ONLY

Not approved medicines. Do not position as injury treatment, recovery therapy, or performance enhancement.

GHK-Cu and KPV build a beauty-science research story

GHK-Cu

Copper tripeptide for matrix and skin-biology research

KPV

Alpha-MSH tripeptide for barrier and inflammation models

BUYER FIT

Skin biology, matrix, barrier, and gastrointestinal research

SELL WITH

Route, formulation, lot evidence, and local claim review

Aspirational presentation must stay anchored to verified research status and permitted local claims.

Batch evidence makes quality easier to trust and sell

LOT ID

Links the vial to one controlled record

COA

Summarizes lot-specific release results

RAW DATA

Supports identity and purity review

LOGISTICS

Documents storage and chain of custody

Professional buyers should be able to verify the lot, specification, testing method, and handling record before purchase.

Four controls protect the product and the research workflow

01

Receive

Inspect packaging, lot identity, temperature condition, and accompanying documents

02

Verify

Match the vial to the COA, specification, and applicable release record

03

Store

Follow the label and lot-specific storage requirements; maintain required cold-chain controls

04

Record

Log receipt, storage conditions, preparation date, and research disposition under institutional SOPs

AURA 5.0 materials are for controlled research use only - never for human or veterinary use.

Move beyond label-only selling

COMMODITY APPROACH

**A product presented as a vial
and a price**

Generic category story
Fragmented documentation
Inconsistent visual presentation
Limited partner enablement

AURA 5.0 DISCIPLINE

**A portfolio presented with
clarity, evidence, and purpose**

Structured research narrative
Lot-specific documentation
Premium brand system
Partner-ready sales support

Premium positioning is credible only when every product claim matches verified documents and local market requirements.

Six steps create a repeatable buyer journey

01

Discover the brand

02

Select the portfolio

03

Review documentation

04

Confirm commercial terms

05

Receive with controls

06

Support the reorder

Give commercial teams the tools to launch with confidence

PRODUCT TRAINING

Clarity

Portfolio logic, research territories, handling boundaries, and confident product explanation

SALES COLLATERAL

Readiness

Premium presentations, product summaries, comparison tools, and buyer-facing education

DOCUMENT SUPPORT

Discipline

Lot-specific COAs, testing records, storage guidance, and controlled claims review

LAUNCH PLANNING

Alignment

Market qualification, partner responsibilities, commercial milestones, and local compliance review

NEXT STEP · Confirm market, customer type, documentation package, pricing, and partner terms before launch.

AURA 5.0

Eight products. One premium sales story.

Research Buyers · Distributors · Strategic Partners

fgkgroup.org

Operated by FGK Group

AURA 5.0 materials are presented for scientific, educational, and research purposes only. They are not represented as approved medicines and are not intended for human or veterinary use. Confirm product specifications, lot records, certificates, storage requirements, claims, and regulatory status before sale or distribution.
